

Pneumatic Fenders & Cargo Transfer Hoses (LPG & Cargo)

At **Atlantic Fenders & Support Services (AFSS)**, we deliver dependable marine interface solutions through the provision of high-performance **pneumatic fenders** and **specialized cargo hoses** for LPG and petroleum transfer operations. These critical utilities are central to safe, efficient, and compliant ship-to-ship (STS), ship-to-shore, and offshore terminal activities.

Our equipment is sourced and maintained in line with international standards, including **ISO 17357** and **OCIMF guidelines**, ensuring durability, performance, and operational safety in the most demanding marine environments.

Our team ensures every deployment is safe, seamless, and aligned with international marine and oil & gas best practices

Key Offerings:

- Pneumatic Fenders: High-energy absorption, low-reaction force fenders suitable for vessel berthing and STS operations
- LPG & Cargo Hoses: Pressure-rated hoses for vapor and liquid transfer of LPG, crude, petroleum, and chemical products
- Certified Handling & Support: Deployment, inspection, pressure testing, and recovery carried out by trained professionals

Utilities:

- Ship-to-ship (STS) transfer support
- Offshore bunkering and cargo handling
- Floating storage & production systems
- Emergency berthing and contingency operations
- Support for oil & gas terminal logistics
